

*Mathieu was born in the suburb of Paris 27 years ago. While getting a master in Computer Arts from ESAV he created and attended the first french film student exchange program with the United States (At the SVA, NYC). After many internship in video or post production companies and designing websites to pay for his studies he gained experience and recognition -Grafika award for Canal Savoir Tv. identity in 2010 and Best drawing in 5th grade in Miss Perballe class- by working for different studio and agencies around the world. While learning how to make a killer coffee and a decent brownie he cultivated his obsession for Typography, fetishism for old film camera and addiction to any sort of images moving or not but mostly towards **Motion and Web design**. By now he figured it must be good to stop referring to himself in the third person and encourage people to visit his portfolio that say way more than theses few lines.*
